

NEWSLETTER - SEPTEMBER 2018

Kia ora koutou

Greetings from **NZ Navigator Trust!**

Since you last heard from us the Trust has been working on our vision of building the GoTo digital space to equip a thriving community sector in Aotearoa New Zealand.

In the meantime, we reached a new milestone with NZ Navigator - organisation number 1,900 registered last week!

Sharing your stories

We'd love to hear from you about your NZ Navigator journey - how have you worked with your assessments to improve outcomes in your organisation? Do you have any ideas you would like to share with other organisations like yours?

Let us know at: info@nznavigator.org.nz

New contributor option for CommunityNet Aotearoa

We've recently added a web form to streamline the contributor process for [CommunityNet Aotearoa](#). Organisations or individuals can contribute resources that meet the [content guidelines](#).

The CommunityNet hub policy is that resources must be:

- free, complete, and stand-alone *and*
- focus on learning and development for community organisations.

If you are keen to share some of your good ideas or have any questions, please contact us at info@community.net.nz.

We've been working on a refresh of CommunityNet Aotearoa resources

Like many organisations, we use analytics to look at the activity on our websites. The Community Resource Kit is regularly one of our most popular sections so we've been focusing on reviewing and updating the content in this part of the website. This work will be completed this month and we'll turn our attention to adding new resources.

Comparing NZ Navigator assessments - how have things changed?

If you have completed more than one organisational assessment, NZ Navigator allows you to compare any two of your finalised reports.

As this example shows, the assessments you compare can be different types (for instance, a single assessment and a multiple participant assessment).

To generate a comparison report, go to *View Assessments*, choose the assessments you wish to compare using the dropdown options and click on *Show comparison*.

Your comparative report is a great way of measuring progress - are the goals and actions you've been working on in your organisation reflected in your latest assessment?

Enjoy the warming weather and the renewal that spring brings...

The team at NZ Navigator Trust
